**SERVING NEW YORK CITY
BUSINESSES**

interstatewaste.com

Action Environmental Services is a
division of Interstate Waste Services, Inc.
A legacy committed to service and
sustainability in our communities.

OUR SERVICES

Commercial Waste Collection Services

Waste and recycling collection for businesses from 1/2 yard containers, up to 40-yard self-contained compactors.

C&D Debris Removal & Recycling

We service thousands of construction firms and offer diversion reporting compliant with LEED online. Our dedicated C&D recycling facility achieves up to 99% recovery of mixed C&D debris.

Disposal Solutions

At our transfer stations, waste is sorted and loaded into tractor trailers or rail cars for disposal. We own and operate one of the largest rail-served landfills in the Northeast. We control our own disposal and are a trusted disposal solution for many local 3rd party haulers.

Containers, Compactors & Roll-off

Whether your business is looking for a convenient long-term waste disposal solution or a temporary/project-based service, we provide the right container combined with reliable and efficient service.

Recycling Facilities

We own and operate seven recycling facilities in the tri-state area: the Bronx, Airmont, Jersey City, Newark, Ewing, Shelton, and North Arlington. Our facilities can process both single stream and dual stream.

Recycling Services

We collect and process fiber, metals and plastics which are separated at our facilities. We also offer organics recycling, construction & demolition debris recycling and specialty programs including electronics, light bulb and battery recycling.

218,000+ TONS
OF RECYCLABLE PAPER, METAL &
PLASTIC PROCESSED IN 2023

what our customers are saying...

"They truly understand the value of partnering to make trash management successful and invisible for a business."

-- CHELSEA PIERS, LP

"Whether it's meeting new waste diversion goals, developing custom reporting, or attending to urgent service needs, IWS is a dedicated partner that we can rely on to get the job done."

-- YANKEE STADIUM

"The team at Action Carting are responsive, professional, and dedicated to providing outstanding service and customer support."

-- COMPASS ONE HEALTHCARE

SUSTAINABILITY

We are your partners in sustainability, leveraging proven and innovative technology to reduce the impact of waste generation on our environment.

Recycling

State-of-the-art facility uses optical technology to efficiently sort, process and separate recyclable materials.

Specialty Recycling

From construction sites to offices, we help ensure your workplace is diverting recyclable materials. We help companies recycle specialty materials such as metal, concrete, masonry debris, electronics, light bulbs and batteries.

Organics Recycling

As the first to offer organics recycling to NYC customers in 2003, we have the equipment and resources to help your business realize your sustainability goals and regulatory requirements.

Greener Transport

We are one of the largest transporters of waste by rail in the Northeast. By utilizing our rail network, we reduce our dependence on long haul transportation, cutting greenhouse gas emissions by 75%.

Bio-Gas Recovery

Our landfill is equipped with a state-of-the-art gas recovery system which converts landfill gas into clean, renewable energy. Our gas to energy system can power 30,000 homes with electricity annually.

ABOUT

Interstate Waste Services is one of the nation's fastest growing and most innovative waste collection and recycling firms.

We are privately-owned, locally operated, and proud of our family legacy in the waste industry.

Our roots as a family business have a strong influence on our company culture. We are committed to doing the right thing for our customers, employees and the environment.
